## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: This invention deals with a current conductor made of braided wire and formed of braided groups of wire strands intersecting one another at an angle, wherein the angle of intersection between the groups intersecting one another is  $90^{\circ}+30^{\circ}$ , a spacer insert positioned with the cross section, wherein the current conductor is used for current densities not exceeding  $5\text{A}/\text{mm}^2$  (claim 1). The above stated claim limitations, along with other claim limitations, is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

3. Applicant's arguments filed August 4, 2008 have been fully considered and they are persuasive. Specifically, the applicant's argument that "Buerger doesn't teach or suggest a current conductor made of braided wire and formed of braided groups of wire strands intersecting one another at an angle, wherein the angle of intersection between the groups intersecting one another is  $90^{\circ}+30^{\circ}$ , a spacer insert positioned with the cross

Art Unit: 2831

section , wherein the current conductor is used for current densities not exceeding  $5\text{A/mm}^2$ , is persuasive and therefore claims 1-8 have been allowed.
